LILMED

COMPLETE MASTER PRODUCT CATALOGUE

All products, descriptions, specifications and table variants from all four supplied Word documents

This corrected edition retains every non-empty paragraph and every table row from each source file, in original order, so that product variants, sizes, catalogue numbers and packaging details are not lost.

Source Documents Included

1. Blood Collection System, Blood Collection Needles, Urine Container & Sharp Container.docx

2. Cell Culture Dish & Bottle, Pipette Tips & Transfer Pipettes. Tube Racks & Test Tubes.docx

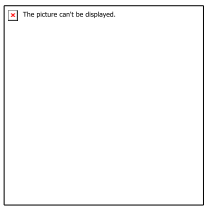

3. Citotest Amended Word Document Batch 1 (1).docx

4. Lilmed PhotoShoot Product 1st Batch.docx

Catalogue structure: each source document is reproduced as a dedicated section. All product descriptions and specification tables are included.

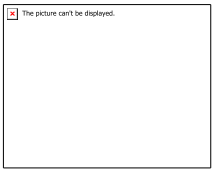

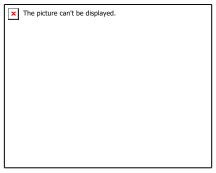

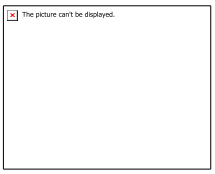

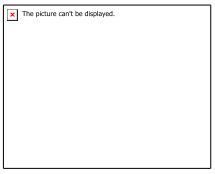

Part 1: Blood Collection System, Blood Collection Needles, Urine Container & Sharp Container

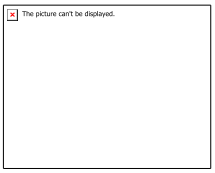

Gongdong Blood Collection System

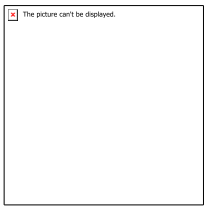

1. 

Capillary Blood Collection Tube

Description: Golden VAC ™ Capillary Blood Collection Tube is used to collect, transport and process capillary blood, especially in children, geriatric patients when a small amount of blood sample is needed.

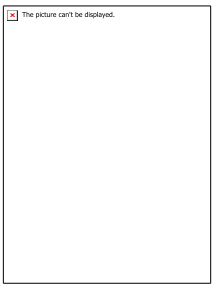

Volume / ml	Size/mm	Addendum	Material	Cap Color	Closure

Blood collection needle

Scalp Vein Blood Collection Needle (Butterfly Needle)

Description: The Gongdong ™ Scalp Needle, also known as the Scalp Vein or Dual Winged Needle, is a medical device primarily used for venipuncture (drawing in the blood) or administration of intravenous (IV) therapies. It is especially useful for accessing small or fragile veins, such as those of pediatric patients, elderly patients, or people with difficult venous access.

Description	Specification	Qty / unit	Wrap	Carton size / cm^3
Butterfly needle	21gx3/4'' green	2000	100pcs/box	57,5 * 46 * 27
Butterfly needle	22gx3/4'' Black	2000	100pcs/box	57,5 * 46 * 27
Butterfly needle	23gx3/4'' Blue	2000	100pcs/box	57,5 * 46 * 27

2. 

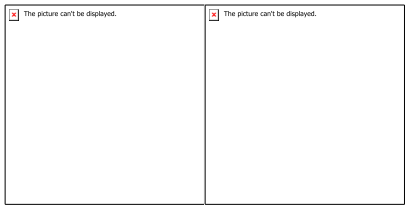

Multi-sample blood collection needles

Description: Multi-sample blood collection needles, also known as pen-type blood collection needles or simple blood collection needles, are commonly used for routine weighting procedures. They are designed for

simple blood collection and are widely used in clinical settings. Below are alternative names and key features of these needles

Description	Color	Qty / unit	Wrap	Carton size / cm^3

Cell culture plates	96	0.33	0.075 ~ 0.2	1	75

3. **Cell Culture Bottle**

Description: Gongdong® Disposable Medium/Square Pet Bottle/PC, made from lightweight crystal and lightweight virgin plastic materials, is ideal for media preparation and storage. Used in bio or pharmaceutical laboratories to reduce the risk of cross-contamination.

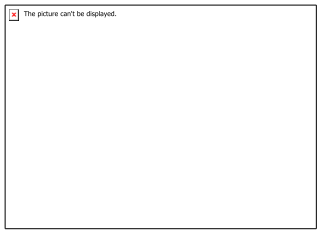

Description of the property	Quantity (PC)	Packaging
Pet Cell Bottle 250ml	100	1pc*100bags

500m Pet Cell Bottle	100	1pc*100bags
Pet Cell Bottle 1000ml	48	1pc*48 bags

4. **Cell Culture Flash**

Description: Gongdong® offers two types of cell culture flasks: those that have treated culture surfaces and those that have surfaces for suspension cell culture. Cell culture flasks are available in sizes of 25, 75 and 125 cm2. For optimal use of the incubator space, the stacked vials are held stable by the cap corresponding to the bottom. The flask is made with a mouth that allows easy access to the entire growing surface.

Cell culture flasks: untreated surface for suspension culture

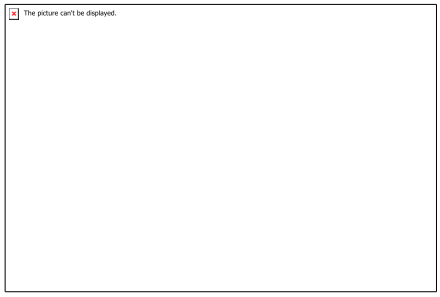

Products	Lid Type	Growing area (CM^2)	PC / Pack	PCS/CAS
Cell culture flasks	Screw cap	25	10	200

Test Tube Racks

1. 

Multi-Function Multi-Bridge Rack

Description: The product (Item No. H1019) is called multi-function rack. All materials used for the products are clean, safe and easy to use.

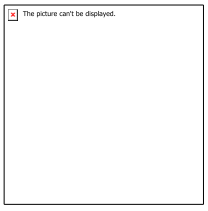

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
Dual-bridge multi-function rack	50 wells	50pcs/ctn	1pc*50bags	61 * 41 * 41

2. 

Pillar-like tube rack

Description: The product is called pillar-shaped tube holder. The single bottom layer is equipped with a silicone seal, which is made of special plastic, so the test tube rack is firm and durable, not easy to break, and can hold all kinds of test tubes of all sizes. All materials used for the products are clean, safe and easy to use.

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
Pillar-like tube rack	ϕ5*16mm	54pcs/ctn	1pc*54 bags	48 * 32 * 32
Pillar-like tube rack	ϕ5*10mm	51pcs/ctn	1pc*51bags	48 * 32 * 32

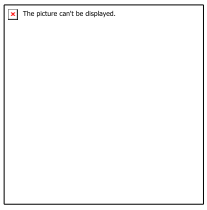

3. 

Test Tube 16*75mm (Round Bottom)

Description: The product (Item No. G11021) is called 16*75mm test tube (round bottom). It is used to hold a small amount of chemical reagents or biological samples, serving as a container for chemical reactions. The

screw cap is made of polyethylene (PE), the tube is made of polypropylene (PP). All materials used for the products are clean, safe and easy to use.

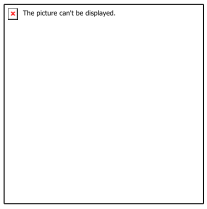

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
Test tube	16*75mm in round bottom	2500pcs/ctn	25pcs*100bags	60 * 40 * 24

4. 

Transport swab with medium

Description: The product (Item No. G10264) is called Transport Swab with Medium. It is used to collect and transport a sample of Gonococcus. The tube specification is 13*163mm. The candle is made of polyethylene (PE), the plastic tube is made of low-density polyethylene (LDPE), the head is in a herd, the stem is made of abs. All materials used for the products are clean, safe and easy to use.

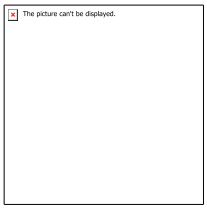

Good description	Quantity (PC)	Packaging	Carton Size (CM)
Transport swab with means	600pcs/ctn	50pcs*12 bags	60 * 40 * 24

5. 

Test Tube 12*75mm, PP

Description: The product (Item No. G1035) is called 12*75mm test tube, PP container. It is used to hold a small amount of chemical reagents or biological samples, serving as a container for chemical reactions. The test tube is made of polypropylene. All materials used for the products are clean, safe and easy to use.

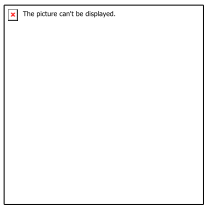

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
Test tube	12*75mm, PP	5000pcs/ctn	500pcs*10 bags	48 * 31 * 48

7. 

Test Tube with Pipette 16*95mm

Description: The product (Item No. G1031) is called 16*95mm Test Tube with Pipette. The test tube is made of polystyrene. All materials used for the products are clean, safe and easy to use.

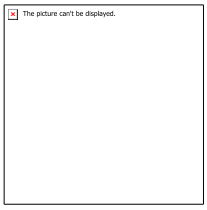

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
Test tube	16*95mm with pipette	1500pcs/ctn	150pcs*10 bags	49 * 33 * 33

8. 

Test Tube 15*150mm, 15ml

Description: The product (Item No. G1027) is called 15*150mm, 15ml test tube with cap. It is used to hold a small amount of chemical reagents or biological samples, serving as a container for chemical reactions. The screw cap is made of polyethylene (PE); The tube is made of polystyrene (PS). All materials used for the products are clean, safe and easy to use.

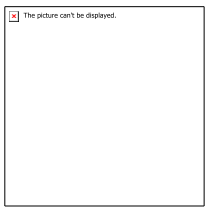

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
15*150mm Test Tube	15*150mm, 15ml	1500pcs/ctn	150pcs*10 bags	49 * 33 * 33

9. 

Test Tube with Graduation, 14.7*101mm with Cap

Description: The product is called test tube with graduation with ceiling. It is used to hold a small amount of chemical reagents or biological samples, serving as a container for chemical reactions. The test tube is made of polystyrene; The cap is made of polyethylene.

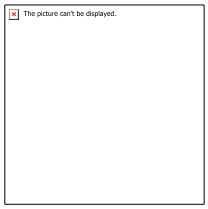

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
Test tube	14.7*101mm with cap	500pcs/ctn	Wholesale	35 * 29 * 27
Test tube	14.7*101mm with cap	500pcs/ctn	Wholesale	31 * 31 * 35

10. 

Test Tube 15*60mm (Flat Bottom)

Description: The product (Item No. G1025) is called 15*60mm (flat bottom) test tube. It is used to hold a small amount of chemical reagents or biological samples, serving as a container for chemical reactions. The cap is made of polyethylene (PE); The tube is made of polypropylene (PP). All materials used for the products are clean, safe and easy to use.

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
15*60mm Test Tube	15*60mm flat bottom	2800pcs/ctn	5pcs*560bags	49 * 33 * 33

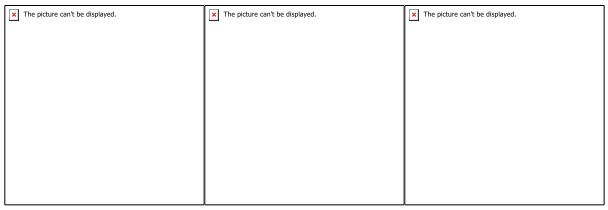

11. 

12*75mm Test Tube, 5ml pp/ps

Description: The product (Item No. G1021) is called 12*75mm test tube, 5ml, PP/PS container. It is used to hold a small amount of chemical reagents or biological samples, serving as a container for chemical reactions. It is made of polystyrene/polypropylene. All materials used for the products are clean, safe and easy to use.

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
Test tube	12*75mm,	4800pcs/ctn	400pcs*12	49 * 32 * 39

	5ml		bags	

12. 

Urine Test Tube

Description: The product is called a urine test tube. It is used for the storage of urine samples, are widely used for urine test. The cup is made of high transparent polystyrene; The cap is made of PP+ silicone film. All materials used for the products are clean, safe and easy to use.

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
12 ml Urine Cup with Cap	12 ml	1500pcs/ctn	150pcs*10 bags	48 * 33 * 42
Urine Test Tube (New Type) with Cap	New Type	2000pcs/ctn	100pcs*20 bags	43 * 35 * 33
12 ml Urine Cup with Cap	12 ml	1500pcs/ctn	150pcs*10 bags	48 * 33 * 42

13. 

16*53mm Test Tube, 6ml with Cap

Description: The product (Item No. G1007) is called 16*53mm, 6ml test tube with cap. It is used to hold a small amount of chemical reagents or biological samples, serving as a container for chemical reactions. The screw cap is made of polyethylene (PE); The tube is made of polystyrene (PS). All materials used for the products are clean, safe and easy to use.

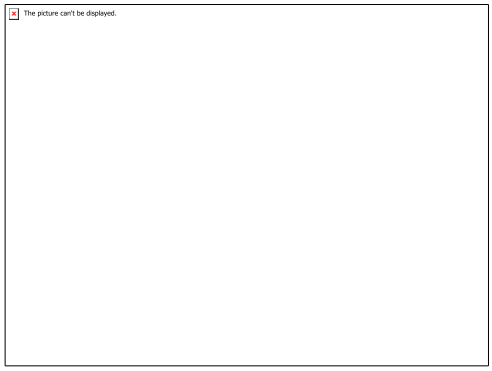

Good description	Specification	Quantity (PC)	Packaging	Carton Size (CM)
15*63mm Test Tube	15*63ml, 6ml	3000pcs/ctn	300pcs*10bags	49,5 * 33 * 37

Part 3: Citotest Amended Word Document Batch 1 (1)

Lilmed Product List Citotest

1. Stainless Steel Blood Lancet
Used to make punctures to obtain small blood specimens

Product Description
● Simple, flat, hardened surgical steel

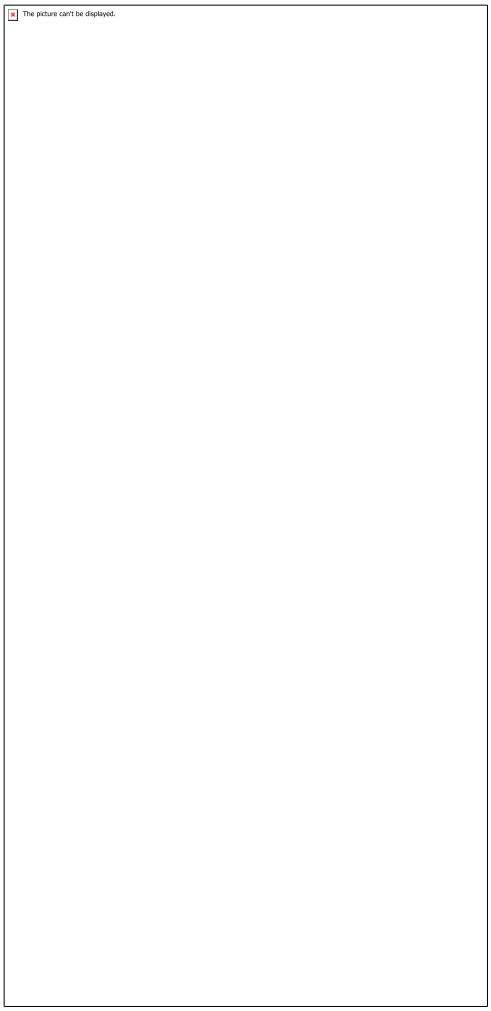

● A tri-bevel needle tip dramatically reduce trauma when skin is penetrated

● Disposable, sterilized by Gamma

P/N	CAT.NO.	LENGTH	PACKING
5811-0001	52000040	40mm	Individual peel pack, 200pcs/box, 100box/carton

2. Cytology Brush

- Moulded handle,Tapered soft tips with nylon bristles, used for collecting cell samples from endocervical or
  buccal, applications in Pap smear tests, cervical cancer and venereal disease diagnosis

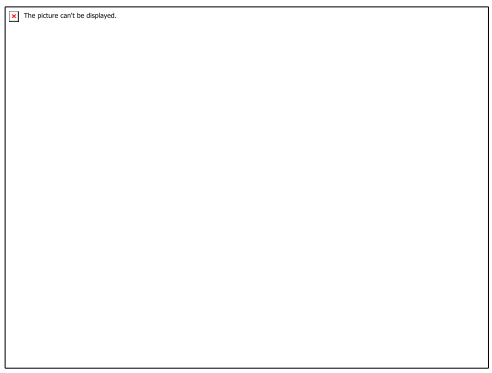

Product Description

	P/ N	DESCRIPTION	PACKING
1	0010-0001 0010-0003	Bulk pack,non-sterile Individual peel pack,E.O. Sterile	100pcs/polybag/inner box,50x100pcs/carton 100pcs/dispenser box,20x100pcs/carton

3. Disposable Pap Smear Kit

Pap smear Kits is a device that provide a comprehensive solution for specimen collection and smear preparation, such as vaginal, cervical and endocervical smears are prepared on one slide for cytological examination.

Product Description

● One Cytology brush （P/N 0010-0001）

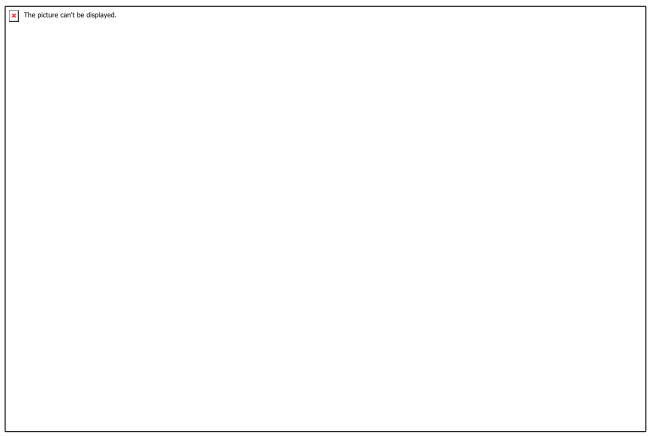

● One cervical scraper（P/N 0012-0003）

● One microscope slide with frosted end（P/N 0303-2122）

P/N	DESCRIPTION	PACKING
0012-0013	Cyto brush, white birch scrape, Single frosted microscope slide	1set/polybag, 50sets/inner box, 10x50sets/carton

4. ESR Pipettes

Non-specific test, ideal for ESR (erythrocyte sedimentation rate) Testing, and also specific detection of inflammation,
helping physicians diagnose the possible presence of disease or abnormality in the body
Glass material and PS material optional

Product Description

Glass ESR Pipettes

Reusable after washing and drying properly

P/N	DESCRIPTION	PACKING
5830-0002	300mm length, graduated up to 195mm,1mm graduation division.	10pcs/inner box, 20 x10pcs/carton

Westergren ESR Pipette

A fibrous plug located at the zero mark, protects from hazardous substances escaping through the top of the pipette. A self-sealing stopper fixed outside the pipette, are suitable for ϕ12 and 13mm blood collection tubes.

Plastic Material, disposable

P/N	DESCRIPTION	PACKING
5830-4005	230mm length, graduated up to 170mm,1mm sub-division	50pcs/polybag, 4x50pcs/innerbox, 10x4x50pcs/carton

Micro ESR System

The ESR system consists of a pipette and a tube. An upper sealing cap located on the top of the pipette. The tube with a

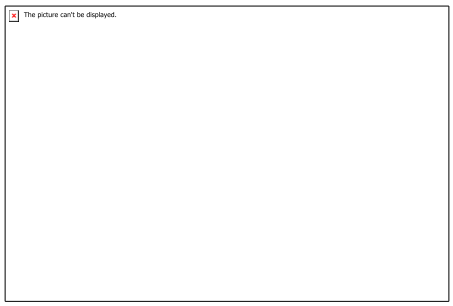

removable and pierceable rubber stopper, is supplied with pre-filled 3.8% sodium citrate. Once blood and citrate are mixed

together, insert the pipette through the stopper and push to the bottom of the tube, the blood automatically reaches the 0 level.

P/N	DESCRIPTION	PACKING
5830-0006	ESR pipette (#5830-0005) with an upper sealing cap and a tube prefilled 200ul 3.8% sodium citrate	100pcs/polybag,1000pcs/carton
5830-0007	ESR Rack, PS material,Diam.185(L)*41(W)*42(H)mm, For #5830-0006	100pcs/carton

5. Glass Test Tube

CITOGLAS.® glass tubes are made of borosilicate glass that withstands thermal shock and chemical attack, reduces pH changes and contaminants leached from soda lime glass tubes. The tubes are uniform bottoms, fire-polished rims, consistent lengths, and convenient packaged in shrink-wrapped shelf inner box. They can be used for mixing heating and/or holding small quantities of chemicals for assays, as well as tissue culture, blood banks, and other laboratory experiments.

Product Description

Disposable Glass Test Tube

Made of borosilicate glass, suitable for general mixing, simple laboratory work, as well for use with samples which are susceptible to pH change, will withstand moderate warming (e.g. in a water bath) Meets ASTM E 890 Specification, Standard specification for Disposable Glass Culture Tubes

7. Spectrophotometer Cuvettes

Cuvettes are filled with samples, usually diluted or suspended in liquid, and placed within a spectroscopy device, such as a colorimeter, fluorometer, or spectrophotometer.

Product Description

UV Grade Cuvettes

Spectrosil material, wavelength range of 190-2500nm,

flat lid and PTFE stopper optional

9. Universal Container-PPMaterial
Designed to collect and store solid or liquid samples, as well process by centrifugation

Product Description
● Translucent PP or transparent PS materials, with assorted color screw cap

● Leak-proof

● Max. centrifugation at 6000×g (PP containers), 4000xg (PS containers)

● Attached spoon optional, suitable for feces sample

● Supplied with or without scale label

10. Urine and Stool Container

Designed to collect and store solid or liquid samples, including food, medicine, urine and feces, opaque containers ideal for photosensitive samples (e.g. urine bile pigment and porphyrin) or when it is required not to show the content

Product Description

● Supplied with translucence and opaque PP material

● Optional spoon, with assorted color screw cap

● Excellent temperature and chemical resistance

● Sizes range of 60ml, 100ml and 150ml

● With or without molded graduation

11. VAGINAL SPECULUM

Disposable bivalve speculum is designed to hold back the anterior and posterior vaginal walls after opening so that the
cervix may be visualized, and has a screw for maintaining the open position during examination. Choose a speculum of
appropriate size according to history such as parity, age, menopausal stage and experience from previous smear taking.

Part 4: Lilmed PhotoShoot Product 1st Batch

Lilmed PhotoShoot Products

1. ALCOHOL HAND SANITIZER (500ml)
500ml alcohol-based hand sanitizer is a rinse-free formula containing 70% to 75% alcohol (ethanol or isopropyl), designed to kill 99.9% of germs on contact.

 Active Ingredients: 70% - 80% v/v Ethanol or Isopropyl Alcohol.

 Inactive Ingredients: Deionized water, Glycerin (moisturizer), and sometimes emollients like Chlorhexidine Gluconate or Hydrogen Peroxide.

 Volume: 500ml.

 Physical Form: Clear liquid or fast-absorbing gel.

 Fragrance: Typically unscented (characteristic alcohol odor) or mildly fragranced.

 Dispenser Type: Pump-top, trigger spray, or flip-top cap.

 Compliance/Standards: Often formulated to align with WHO guidelines and local regulatory standards such as SABS.

 Usage: Kills 99.9% of bacteria and viruses on contact; apply 2.5ml to 5ml and rub for 20 - 30 seconds until dry.

2. PIPETTE TIPS GILSON YELLOW 5-200UL BOX OF 1000
yellow pipette tips are disposable liquid-handling consumables used with micropipettes. Packaged in a bulk box or bag of 1000, they are typically made from medical-grade, heavy-metal-free polypropylene for high visibility and accurate sample dispensing.

 Volume Capacity: 5 µ L to 200 µ L (often utilized with P20, P100, and P200 models). [1, 2]

 Color: Yellow for easy visual volume identification. [1, 2, 3, 4]

 Material: 100% virgin polypropylene, non-wetting to minimize sample retention. [1, 2, 3, 4]

 Compatibility: Universal fit engineered to seal perfectly on Gilson Pipetman as well as other major brands (Eppendorf, Finnpipette, Socorex). [1, 2]

 Packaging: Typically supplied in bulk bags or economical EASYPACK formats of 5 individual packs of 200 tips (totaling 1,000 tips), often tamper-proof.

3. pH Neutral eyewash station (1x500ml eyewash bottle + 1x200ml pHneutral

An emergency eyewash station with a 200ml pH-neutral bottle and 500ml saline solution is designed for rapid first-aid response to chemical eye injuries. The pH-neutral solution neutralizes acids and alkalis, while the saline solution flushes out debris and foreign particles.

 Station Contents: 1x 200ml pH Neutral bottle & 1x 500ml Saline (Sodium Chloride) bottle.

 pH Neutral Bottle (200ml): Contains a 4.9% sterile phosphate buffer solution designed to quickly neutralize acids and alkalis.

 Eye Wash Bottle (500ml): Contains 0.9% sterile sodium chloride, which matches the eye's natural fluid, to safely wash away dust, debris, and chemical residue.

 Unit Dimensions: Standard wall boxes are approximately 290 mm × 230 mm × 80 mm.

 Shelf Life: Sealed bottles typically have a 3 to 3.5-year expiry.

 Compliance: Frequently manufactured to comply with the European standard EN 15154-4 for personal eyewash equipment

4. LOOPS INNOCULATING 10UL DISPOSABLE (50 packs of 20) box/1000
disposable inoculating loops provide a sterile, ready-to-use solution for microbiology workflows. Packaged conveniently in 50 peel-pouches of 20 loops each, this 1000-count case eliminates the need for flaming, preventing cross-contamination risks and agar damage during streaking

 Volume & Calibration: Precisely holds 10 µL for accurate liquid sample transfer and streaking.

 Material & Flexibility: Typically manufactured from flexible, biologically inert, and non-toxic plastics like Polystyrene (PS) or Polypropylene (PP).

 Design: Smooth loop surfaces prevent gouging or cutting of the agar gel surface during streaking.

 Sterility: Pre-sterilized via Gamma irradiation or Ethylene Oxide (EtO) to eliminate cross-contamination and the need for open-flame sterilization.

 Color-Coded: Generally colored **blue** or light blue for immediate volume and size identification

5. PIPETTE TIPS GILSON BLUE 200-1000UL BOX/1000
These are premium, **blue-colored polypropylene micropipette tips** designed for volumes of 200-1000 µL. Optimized to fit Gilson PIPETMAN and other universal pipettes, they ensure highly accurate, leak-free liquid transfers and come in a bulk box of 1000 tips.

 Volume Range: 200-1000 µL

 Color: Blue (industry standard for this volume range)

 Material: High-purity, medical-grade polypropylene

 Compatibility: Gilson PIPETMAN and universal-fit pipettes

 Packaging: Box of 1000 tips (often supplied as bulk refill bags or racked, depending on the manufacturer)

 Safety: Typically autoclavable for sterile applications

6. REGULATIONS FIRST AID REFILL

A Regulation 3 or 7 First Aid Refill replenishes your workplace first aid box to comply with South African Occupational Health and Safety (OHS) Act requirements. These kits include essential medical and biohazard supplies to treat 5 to 50 persons.

 Wound care: Antiseptic solution (100ml), sterile and non-sterile gauze swabs, and cotton wool for padding.

 Bandages: Triangular bandages, conforming bandages (75mm and 100mm), and elastic adhesive plaster.

 Dressings: First Aid Dressings No. 3 and No. 5, and a burn dressing (e.g., Burnshield).

 Tools: Forceps, bandage scissors, safety pins, and paper tape.

 Safety: CPR mouthpieces and latex/nitrile gloves.

 Spill/Waste: Regulation 7 kits additionally feature a body fluid response kit with absorbent materials, disinfectant, and red hazardous waste bags.

7. FIRST AID BOX INCLUDING CONTENTS

A standard first aid box contains essential supplies to treat minor injuries and manage initial medical emergencies. Core contents include wound cleaning and bandaging materials (sterile gauze, adhesive plasters, and roller bandages), protective gear (disposable gloves, CPR masks), and basic medical tools like scissors and tweezers

 Wound Care: Adhesive bandage strips (assorted sizes), sterile gauze pads, non-stick dressing pads, and adhesive medical tape.

 Bandages: Roller bandages, elastic compression bandages, and triangular bandages (often used as arm slings).

 Protection & Hygiene: Non-latex disposable gloves, antiseptic wipes, antibiotic ointment, and a CPR face shield.

 Tools: Sharp scissors, splinter tweezers, safety pins, and a digital thermometer.

 Emergency Extras: Emergency thermal (foil) blankets, instant cold packs, an eyewash solution, and an instruction manual

8. SAMPLE CUP PLASTIC 1ML- NESTING

A 1mL nesting sample cup is a small plastic insert used in medical laboratories for small-volume samples. It transfers a small specimen from an original collection tube and is placed inside that same original tube.

 Volume: 1mL

 Material: Typically clear polystyrene (PS) for rigidity and visibility

 Compatibility: Designed to fit standard 12mm and 13mm diameter blood collection or test tubes

 Instrument Use: Ideal for automated chemistry and immunoassay analyzers

9. SLIDE TRAY PLASTIC (20 SLIDES) EA

A **SLIDE TRAY PLASTIC (20 SLIDES) EA** refers to a reusable, plastic laboratory organizer designed to hold 20 standard microscope slides (25 × 75 mm) in a flat, horizontal position.

 Layout: Features 20 numbered, recessed slots with individual thumb-cuts or elevated notches for easy slide removal.

 Material: Typically made from durable, chemical-resistant, and lightweight plastics like polystyrene, PVC, or ABS.

 Stackability: Designed with interlocking features or flat bottoms to allow secure, space-saving stacking on benchtops or in storage shelves.

 Visibility: Many versions include a white or high-contrast background to make specimen coloration easy to see.

10. SWAB THROAT PLAIN 150MM X 100 Bx 1000

A **plain throat swab** is a sterile, dry medical instrument used for collecting fluid or cell samples from the back of the throat or tonsils. The 150mm length allows easy reach, and the bulk packaging is ideal for clinics and laboratories

 Dimensions: 150 mm (shaft length), standard for reaching the posterior pharynx without causing excessive gagging.

 Packaging: Supplied in individual or bulk peel-packs in boxes of 100 (totaling 1,000 swabs per case).

 Tip Material: Typically soft, highly absorbent, and non-toxic (e.g., medical-grade cotton or viscose/rayon) to ensure maximum sample collection.

 Shaft Material: Flexible and breakable plastic or wood, designed not to splinter during sampling.

 Sterility: Sterilized (often via ethylene oxide or radiation) to prevent cross-contamination prior to testing

11. PIPETTE SEROLOGICAL 10ML SINGLE WRAP STERILE (500/BOX)

A 10ml single-wrap sterile serological pipette is a disposable laboratory tool used for the precise aspiration and dispensing of liquids. Supplied in a box of 500, these pipettes are individually sealed in peel-apart wrappers to maintain sterility and are widely used in cell culture and microbiology

 Capacity: 10ml, with ascending/descending scales and negative graduations for extra capacity.

 Packaging: Individually wrapped in paper/plastic peel-packs for aseptic handling and reduced static cling.

 Sterility & Purity: Gamma/E-beam sterilized, non-pyrogenic, and certified free of DNase, RNase, and human DNA.

 Material: Made of high-clarity, transparent polystyrene (PS) for easy meniscus viewing.

 Design: Plugged with a polyolefin or polyester fiber filter to prevent over-pipetting and contamination from aerosols.

 Identification: Typically color-coded (often orange) for easy volume identification in the lab.

12. BONE MARROW BIOPSY/ASPIRATION NEEDLE 10/BOX

A bone marrow biopsy/aspiration needle is a sterile, single-use medical device used to extract bone marrow samples from the iliac crest or sternum for hematological diagnosis and oncology staging.

 Cannula and Stylet: Constructed with medical-grade stainless steel featuring sharp, match-ground tips for easier penetration through hard cortical bone.

 Adjustable Needle Stop: Allows clinicians to control depth of penetration, particularly during sternal procedures.

 Luer Lock Connector: Fits standard syringes securely for smooth aspiration of liquid marrow.

 Extraction Cannula / Core Retention: Many designs feature specialized internal mechanisms to trap and retrieve quality core biopsy samples without altering the architecture

13. SUPREME STER AND POWD FREE SURG GLOVE BOX/50

Supreme Star and Powder Free Surgical Gloves (Box of 50) are sterile, hand-specific natural rubber latex surgical gloves. Designed for high-risk medical procedures, they provide an excellent biological barrier while maximizing comfort and tactile sensitivity.

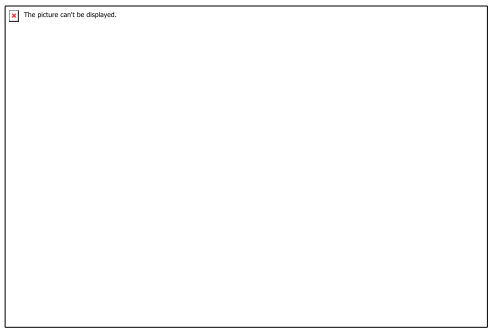

Specifications

- **Material:** Premium quality Natural Rubber Latex.
- **Thickness:** Usually between 0.19 mm and 0.24 mm in the palm area for puncture resistance without sacrificing dexterity.
- **Sizing:** Typically available in precise anatomical sizes (e.g., 6.0, 6.5, 7.0, 7.5, 8.0, 8.5, and 9.0) to accommodate diverse hand dimensions.
- **Compliance:** Manufactured to meet strict medical and surgical standards (such as ASTM D3577)

14. VAC ESR PIPETTE W/ADAPTOR 200MM GRAD BX 200

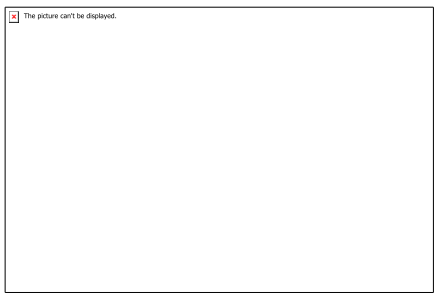

This item is a disposable, transparent polystyrene pipette used to manually measure the **Erythrocyte Sedimentation Rate (ESR)** based on the traditional Westergren method. It includes an adaptor that allows the pipette to be inserted directly into a vacuum blood collection tube for safe, closed-system readings.

- **Graduation:** Clearly marked from 0 to 200 mm to measure how far red blood cells settle in 1 hour.
- **Adaptor:** A rubber or plastic fitment that seals the pipette into the primary blood collection tube and automatically sets the blood to the true zero line.
- **Filter/Plug:** Typically designed with a self-sealing, fibrous plug or aerosol barrier at the top to stop hazardous substances and blood from overflowing.
- **Quantity:** Box of 200 units.

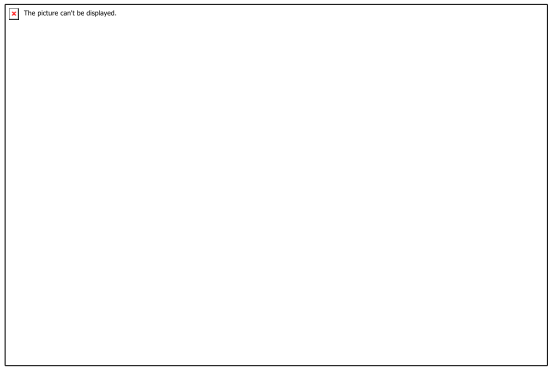

15. SYRINGE 10ml 100/BOX

A 10ml syringe (100/box) is a sterile, single-use, disposable medical device primarily used for fluid measurement, medication administration, or irrigation.

- **Material**: Constructed from non-toxic, medical-grade polypropylene.
- **Plunger**: Features a smooth-gliding, latex-free piston or gasket for comfortable handling.
- **Tip Types**: Available as a **Luer Slip** (push-on) or **Luer Lock** (screw-on) for a secure connection to needles or ports.
- **Sterility**: Ethylene Oxide (E.O.) gas sterilized and non-pyrogenic.
- **Capacity**: Measures up to 10 ml of liquid

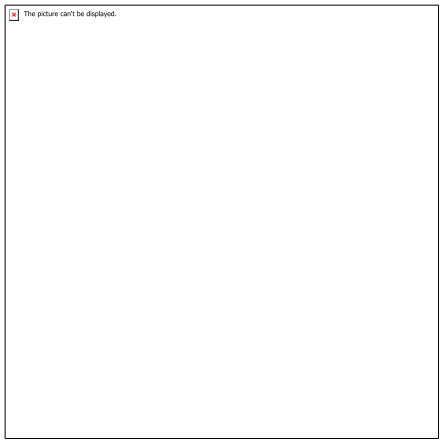

16. Transparent Surgical TAPE 12mm x 10m/MIN (20 Rolls/Tray)
Transparent surgical tape is a breathable, perforated plastic adhesive designed to securely hold wound dressings, gauze, and medical tubing. The 12 mm × 10 m bi-directional tear format allows clinicians to easily customize lengths, even when wearing gloves. Trays typically contain 20 rolls for economical single-use.

Key Features

- **Dimensions:** 12 mm width × 10 m length per roll.
- **Packaging:** Trays containing 20 rolls.
- **Material:** Transparent, perforated, and water-resistant plastic.
- **Tearability:** Easily torn by hand in both directions for quick, hassle-free application.
- **Skin Compatibility:** Hypoallergenic, latex-free, and leaves minimal adhesive residue upon removal.
- **Breathability:** Porous design allows the skin to breathe and maintains skin integrity.

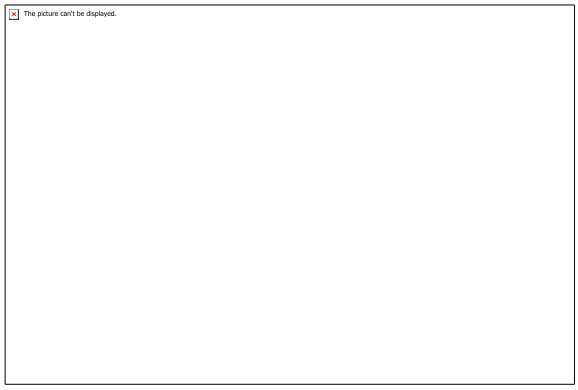

17. MICROPORE TAPE 12mm x 3m/ MIN (20 Rolls/Tray)
3M Micropore Surgical Tape (12mm x 3m) is a hypoallergenic, breathable paper tape designed for medical and first-aid use. The **(20 Rolls/Tray)** bulk configuration provides a steady, hygienic supply for medical clinics, pharmacies, or home first-aid kits.

- **Gentle & Safe:** Latex-free and hypoallergenic, minimizing the risk of skin irritation or contact dermatitis.
- **Highly Breathable:** Maintains skin integrity by allowing air to reach the skin.
- **Clean Removal:** Leaves minimal to no adhesive residue behind upon removal.
- **Reliable Securement:** Excellent for repeated applications, making it ideal for continuous dressing changes

18. GLOVES VINYL LATEX FREE LARGE 100/Box

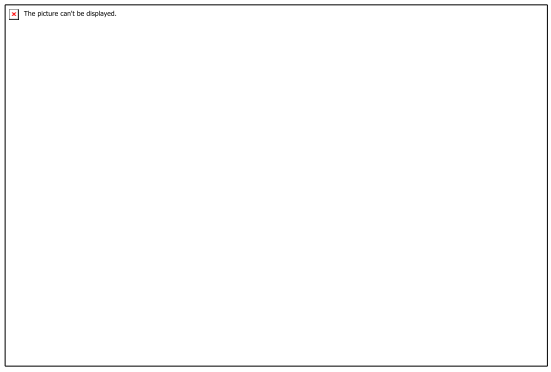

These are disposable, ambidextrous, and powder-free synthetic examination gloves. Packaged in a convenient 100-count box, they are completely latex-free, making them safe for individuals with natural rubber allergies. They feature a smooth, loose fit for reduced hand fatigue during tasks that require frequent changing.

- **Material:** Medical-grade polyvinyl chloride (PVC).
- **Fit & Feel:** Ambidextrous and comfortable; ranges in thickness from 2.4 mil to 4 mil depending on the brand.
- **Safety:** Non-toxic, latex-free, and powder-free design.
- **Applications:** Ideal for short-term, low-risk uses such as routine medical exams, food handling, beauty salons, and general household cleaning

19. STICK APPLICATOR BX 1000

A "Stick Applicator BX/1000" refers to a bulk box of 1,000 disposable applicator sticks, commonly featuring either a cotton tip or a plain, splinter-free wooden shaft. They are widely used across medical, laboratory, cosmetic, and craft settings for safely applying topical treatments, cleaning delicate parts, or mixing samples

 Material: High-quality, biodegradable birch wood and highly absorbent medical-grade cotton.

 Design: Standard 6-inch (approx. 15 cm) length with a uniform, rigid shaft.

 Packaging: Sold in convenient, non-sterile bulk boxes of 1,000 for high-volume, single-use applications.

 Safety: Latex-free, splinter-free, and designed for single-use to prevent cross-contamination

20. SLEEVE PROTECTORS FOR PM PROCEDURES

Sleeve protectors are disposable or reusable arm covers worn over clothing. Designed for hygiene, they extend from the wrist to the elbow or upper bicep, creating a barrier against spills, splashes, and cross-contamination during medical and maintenance procedures (PM)

 Material Options: Typically made from waterproof Polyethylene (PE), Polyvinyl Chloride (PVC), or lightweight non-woven fabrics.

 Secure Fit: Feature elasticated bands at both the wrist and upper ends to ensure they stay in place without restricting movement.

 Protection Type: Prevents your everyday clothing from getting soiled, stained, or exposed to infectious materials and cleaning chemicals.

 Convenience: Usually offered in universal sizes and packaged in bulk quantities (e.g., boxes of 100) for single-use applications

21. PACKAGING TAPE, 48mm X 50m

White 48mm x 50m packaging tape is a strong, opaque adhesive used for securely sealing boxes, parcels, and cartons. The 48 mm width provides excellent sealing surface for shipping, while the 50 m length gives ample coverage. The solid white backing completely covers underlying text and provides a clean, professional finish.

 Dimensions: 48 mm width × 50 m length

 Material: Durable, tear-resistant polypropylene

 Finish: Crystal clear (perfect for keeping labels legible) or buff/brown (blends seamlessly with cardboard)

 Adhesive: Strong bonding strength that resists splitting during transit

 Dispenser Compatibility: Compatible with standard handheld tape dispensers for smooth and quiet application

22. 3M FACE MASK 1860 N95 PARTICULATE RESPIRATOR

The **3M 1860 N95** is a medical-grade, disposable particulate respirator and surgical mask. NIOSH-approved and FDA-cleared, it provides at least 95% filtration efficiency against airborne particles. It is fluid-resistant to protect against blood and bodily fluids and meets CDC guidelines for *Mycobacterium tuberculosis* exposure control.

 Dual Protection: Acts as both an N95 respirator and a fluid-resistant surgical mask.

 Filtration: Features > 99% Bacterial Filtration Efficiency (BFE) based on ASTM F2101 standards.

 Design: Utilizes a collapse-resistant cup shape, braided headbands, and cushioning nose foam.

 Seal: Equipped with an adjustable nose clip to ensure a custom fit and minimize eyewear fogging.

 Materials: Constructed from 3M's proprietary advanced filter media for easier breathing; entirely free of natural rubber latex components.

23. GAUZE SWABS, 75X75X8 PLY, N/STERILE 100/Box
This item is a bulk box of 100 disposable, 100% woven cotton or non-woven medical pads. They are unsterilized (intended for general use where sterility is not required), measure 75 mm × 75 mm, and feature an 8-ply thickness for absorbency.

 Dimensions: 75 mm × 75 mm (approx. 3 × 3 inches)

 Ply: 8-ply thickness (8 layers of woven or non-woven material) for optimal absorbency and cushioning

 Sterility: Non-Sterile (N/STERILE) — best suited for general cleaning, padding, and secondary dressing where an open surgical environment is not a factor.

 Packaging: 100 swabs supplied in a single box or multi-pack.

 Material: Typically made from 100% pure cotton or a soft non-woven material to minimize linting and skin irritation

24. GAUZE SWAB GREEN 100X100 (100/Pkt)

The **GAUZE SWAB GREEN 100X100 (100/Pkt)** refers to a pack of 100 medical-grade gauze pads. The green color is specifically dyed for easy visual differentiation from standard white gauze, commonly used in surgical procedures or to avoid cross-contamination in dressing packs

 Dimensions: 100 mm × 100 mm (10 cm × 10 cm).

 Material: Typically made of high-quality, 100% woven cotton or non-woven fabric.

 Ply Count: Usually available in 8-ply or 12-ply, which determines the thickness and absorbency.

 Sterility: Often sold as non-sterile (N/S) for general wound cleaning or secondary dressing, though sterile variants are also used.

 Packaging: Supplied in a convenient, bulk packet of 100 pieces, perfect for clinics, hospitals, and medical kits

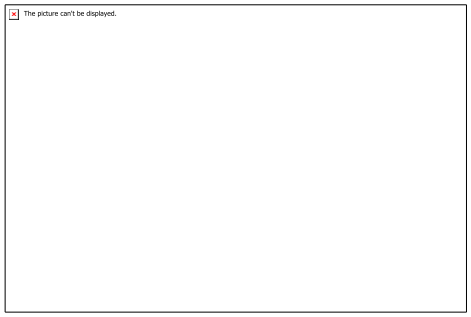

25. adhesive Tape 2.5cm x 10cm
An adhesive tape measuring 2.5cm x 10m (commonly categorized as surgical, microporous, or dressing retention tape) is a medical-grade tape used to secure wound dressings, gauze, and medical tubing. It is highly breathable, hypoallergenic, and designed to adhere securely to the skin without leaving sticky residue upon removal

- **Material**: Typically constructed from non-woven paper or porous fabric that allows the skin to breathe.
- **Hypoallergenic**: Safe for sensitive skin, infants, and long-term wear.
- **Easy Application**: Can be easily torn by hand to the exact length needed

26. Hypodemic Syringe 10ml

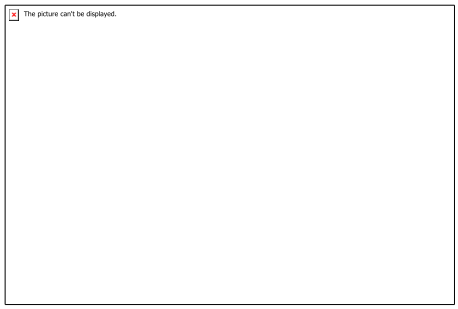

A 10ml hypodermic syringe is a sterile, single-use medical device used for precise fluid injection, withdrawal, or measurement. It features a clear medical-grade barrel with distinct graduated volume markings, typically in increments of 0.2ml, and is equipped with either a Luer-slip or Luer-lock tip for secure needle attachment.

- **Capacity:** 10 ml
- **Material:** Non-toxic, medical-grade polypropylene (barrel) and polyethylene or thermoplastic elastomer (plunger/gasket)
- **Tip Type:** Luer Lock (secure, twist-on fit) or Luer Slip (push-on fit)
- **Graduations/Scale:** Clearly marked increments of 0.2 ml or 0.5 ml
- **Sterility:** Ethylene Oxide (ETO) gas or electron beam sterilization; single-use only
- **Safety:** Non-pyrogenic, latex-free, and PVC-free
- **Design:** Available in 2-part (barrel and plunger) or 3-part (includes a rubber/silicone gasket for smoother flow) configurations

27. Surgi Plus Luer Slip 3 Part Syringe

Surgi Plus Luer Slip syringes feature a 3-part design (barrel, plunger, and latex-free gasket) with a friction-fit push-on tip. They are manufactured from non-toxic, medical-grade materials, sterilized by Ethylene Oxide (E.O.) gas, and widely utilized across healthcare settings for precise fluid delivery and medication administration.

- **Tip Type:** Standard Luer Slip (Concentric or push-on)
- **Material:** Medical-grade polypropylene (barrel) and Polyethylene, DEHP/PVC-free
- **Gasket:** Latex/PVC-free synthetic rubber with silicone lubrication for a smooth, airtight draw
- **Sterility:** E.O. gas sterilized, individually blister-packed, single-use
- **Safety Features:** Integrated plunger backstop prevents accidental plunger removal during aspiration
- **Visibility:** Highly transparent barrel with bold, clear, long-lasting scale graduations

Available Sizes & Packaging:

- **1ml:** Box of 100
- **3ml:** Box of 100
- **5ml:** Box of 100
- **10ml:** Sold in packs/boxes
- **20ml:** Box of 50
- **50ml / 60ml:** Box of 25 to 50
